## EDITOR'S NOTE

Present issue is devoted to the scientific news in the field of Power Electronics. Different innovation solutions, results of scientific development researches, concerning Inverters, IGBT, MOSFET, Soft Magnetic Materials, Nanocrystalline etc. are presented. Each paper has been reviewed by two persons, having academic rank. In addition of publishing in the magazine, papers will be presented on the III International Science Conference for Young Researchers "Technical Science and Industrial Management".

As we announced in the previous issue of the magazine, from 2<sup>nd</sup> to 4<sup>th</sup> September 2009 two scientific conferences will take place in Nessebar, Bulgaria – II International Science Conference Knowledge Society and III International Science Conference for Young Researchers "Technical Science and Industrial Management". The International Organizing Committee of the two conferences has received more than 170 applications for participation, and has submitted to the International Scientific Committee for review more than 140 papers. After primary revise from the International Scientific Committee, the Editorial Board as well as the reviewer from the magazine executed second review of the admissible papers. In this way each paper, eligible for presentation at II International Science Conference Knowledge Society or III International Science Conference for Young Researchers "Technical Science and Industrial Management" has been reviewed by two independent persons, having academic rank. These papers will be published in the next specialized issues of the magazine.

Current issue presents The Indicative Working Program, including the allocation into different sessions of the two conferences for admissible papers. Scientists from Bulgaria, Romania, Poland, Hungary, Ukraine, Lithuania, Latvia, Austria, Morocco, Macedonia, Czech Republic, and Slovakia, representing more than 20 universities and Research and Development Centers will participate in the conferences.
