EDITOR'S NOTE

In this issue of the magazine we published three papers, focused on the current international development and three other, aimed at the company efficient management.

We presented different and interesting points of view, regarding Strategic Management of Enterprises in Oil and Gas Complex, the Arab Spring and Federalism as a Means for Ethnic Conflict Resolution. All scientific papers were put under independent review from two persons with academic rank. Editorial Board express gratitude to the reviewers for their qualitative and thorough work.

Editorial board will gratefully accept any proposals relating to the topics next year. Scientists are invited to submit reports via <http://www.tksi.org> in the following scientific fields: Higher Education, Innovation, Advanced Technologies, Management and Public Administration.

We kindly invite our readers from the academic community to participate next year in our two annual conferences: V International Science Conference Knowledge Society и International Science Conference for Young Researchers "Technical Science and Industrial Management". The next year they will be held traditionally in September. We chose Varna as the host city for the conferences. We hope these conferences next year to be come welcome a catalyst for exchange of scientific opinions, and a useful cooperation among scientists from different countries, working in the field of the Knowledge Society.
