EDITOR'S NOTE

You hold serial VI-th volume (number 1 – mart 2013) of scientific journal “KSI Transactions on Knowledge Society” – the magazine, which annually provides 4 times a year opportunity to exchange valuable scientific opinions of scientists from around the world, related to the society development and knowledge based economy. This is the reason that from the very first edition all scientific papers are put under independent review from two persons with academic rank. They select most valued scientific papers.

In order to alleviate our readers, as well as our authors and reviewers of the papers, we launched this year a new on-line platform based on the Open Journal System. As a result of this:

- authors will be able to submit more easily their materials for review and potential publishing;

- an opportunity for on-line reviewing is created. Thus on one hand facilitates the work of the reviewers but in the other hand – gives a base to increase the quality of reviewing;

- creates conditions to increase the number of reviewers.

Currently, reviewers of the magazine are professors and associate professors from 10 countries and 15 universities. We encourage our readers to become reviewers of the magazine.

As previously all 21-th published issues of the magazine, all are available for free in full content for everyone interested scientist from the web-site of the magazine – www.tksi.org.

This year marks the end of the present programming period for absorption of European Union funds. For Bulgaria and Romania this is the first programming period. This is the reason that in this year we will give priority to the articles related to the management of the European Union funds in different countries – member states. We expect reports that present not only the results, but also and challenges in the process of absorption EU funds, focused on the good practices in the implementation of EU policies. On the same time, papers should identify the opportunities for increasing effectiveness and efficiency in the process of management implementation, control of EU funds.

We welcome your scientific views on that main topic.

Kind regards of all our readers!
